Agent turns ideas into code.
A human-AI programmer, orders of magnitude more effective than any developer alone.

[Learn about Agent →](#)

```
Dashboard.tsx  X SupportChat.tsx
Cursor

use client;

import React, { useState } from "react";
import Navigation from "./Navigation";
import SupportChat from "./SupportChat";

export default function Dashboard() {
  const [activeTab, setActiveTab] = useState("support");

  return (
    <div className="flex h-[600px] border rounded-lg overflow-hidden">
      <div className="w-64 border-r"> ( Tab to jump here )
      </div>
      <div className="w-80 border-l">
        <SupportChat />
      </div>
    </div>
  );
}

```

Magically accurate autocomplete.

Our custom Tab model predicts your next action with striking speed and precision.

[Learn about Tab →](#)

The new way to build software.

It was night and day from one batch to another, adoption went from single digits to over 80%. It just spread like wildfire, all the best builders were using Cursor.

Diana Hu
General Partner, Y Combinator

"My favorite enterprise AI service is Cursor. Every one of our engineers, some 40,000, are now assisted by AI and our productivity has gone up incredibly."

Jensen Huang
President & CEO, NVIDIA

The best LLM applications have an autonomy slider: you control how much independence to give the AI. In Cursor, you can do Tab completion, Cmd+K for targeted edits, or let it rip with the full autonomy agentic version.

Andrey Karpathy
CEO, Eureka Labs

Cursor quickly grew from hundreds to thousands of extremely enthusiastic Stripe employees. We spend more on R&D and software creation than any other undertaking, and there's significant economic outcomes when making that process more efficient and productive.

 Patrick Collison
Co-Founder & CEO, Stripe

The most useful AI tool that I currently pay for, hands down, is Cursor. It's fast, autocompletes when and where you need it to, handles brackets properly, sensible keyboard shortcuts, bring-your-own-model... everything is well put together.

 shadcn
Creator of shadcn/ui

It's definitely becoming more fun to be a programmer. It's less about digging through pages and more about what you want to happen. We are at the 1% of what's possible, and it's in interactive experiences like Cursor where models like GPT-5 shine brightest.

 Greg Brockman
President, OpenAI

Stay on the frontier

Access the best models

Choose between every cutting-edge model from OpenAI, Anthropic, Gemini, and xAI.
